Chapter 333: The Divine Nexus Network

Sung Jin-Woo recognized the importance of maintaining communication, transportation, and energy flow across the ever-expanding multiverse. To achieve this, he created the Divine Nexus Network, a system of interconnected gateways and energy conduits designed to link all realms seamlessly.

The Creation of the Nexus Gates

Using his unparalleled power, Sung Jin-Woo materialized Nexus Gates—massive, intricately designed portals capable of instantaneous travel across realms.

Features of Nexus Gates:

1. Infinite Capacity:

Each gate can accommodate armies, fleets, or even entire civilizations.

2. Self-Sustaining Energy:

Powered by the Spiral Nexus and divine crystals, they require no external input.

3. Absolute Security:

Protected by layers of divine barriers, shadow guards, and Eternal Guardians.

4. Adaptive Functionality:

Can be used for travel, resource transportation, or energy distribution.

The Divine Energy Conduits

To ensure an uninterrupted flow of energy, Sung Jin-Woo created Divine Energy Conduits, channels of divine power connecting the Spiral Nexus to every realm.

Capabilities of Energy Conduits:

1. Mana Flow Regulation:

Distributes mana evenly across realms, preventing mana imbalances or shortages.

2. Energy Amplification:

Enhances the natural mana density of realms, promoting growth and development.

3. Restoration Mechanism:

Automatically repairs any damaged section of the conduits.

The Nexus Overseers

To manage the network, Sung Jin-Woo created Nexus Overseers, artificial intelligences infused with divine consciousness.

Overseer Features:

1. Omnipresent Awareness:

Can monitor all Nexus Gates and energy conduits simultaneously.

2. Decision-Making Autonomy:

Capable of handling emergencies without needing direct orders.

3. Integration with Guardians:

Works in tandem with the Eternal Guardians to ensure flawless operation.

Expansion Across Realms

The Divine Nexus Network rapidly expanded, linking every realm created or governed by the Divine Triad.

Key Locations:

1. Umbra Citadel Gate:

The central hub of the network, located in Sung Jin-Woo's domain.

2. Eternis Draconis Gate:

Positioned in Sung Su-Ho's realm, serving as a major node for dragonkind.

3. Absolute Castle Gate:

Ashborn's domain houses a gate that connects directly to realms of light.

4. Shadowverse Gate:

Dedicated to the high humans, elves, and dwarves.

5. Earth Nexus Gate:

Positioned on Earth, enabling seamless travel for its mana-adapted inhabitants.

The Divine Triad's Reflection

Gathered in the Absolute Castle, the Divine Triad observed the success of the Nexus Network.

Sung Su-Ho:
“Father, this network has transformed the multiverse. It’s no longer fragmented but united in purpose and connectivity.”

Ashborn:
“It is a structure that not only binds realms but also fosters peace and cooperation. The Divine Nexus is the foundation of a golden age.”

Sung Jin-Woo smiled, his voice resonating with power.
“This is more than a network. It is a symbol of unity. Through it, we shall ensure that every being, from the smallest shadow to the mightiest dragon, thrives in harmony.”

A Unified Multiverse

With the Divine Nexus Network fully operational, the multiverse entered a new phase of interconnectivity. No realm was isolated; no civilization was left behind.

Sung Jin-Woo’s vision of a united and prosperous multiverse grew ever closer, guided by his unparalleled wisdom and power. The Absolute One had not only reshaped existence but had given it purpose, order, and unity.
